- **SOMAYA**

**Start Button:** When press this button Machine Starts and vibration sensor is starting.

**Stop Button:** When press this button Vibration Sensor is stopping.

**Adjust (+):** This button increasing is gram.

**Adjust (-):** This button decreasing is gram.

**Load Cell(Button):** ESP32 MicroPython Simulator doesnt support loadcell library for this reason we use button to increase gr.

**Servo Motor:** If gramAdjust equal to real gram servo motor will work.
